DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 14-19, 20-26, 33-39, 40-42, and 64-67, drawn to performing a tax-deferred transaction involving an investor owning a relinquished property by exchanging said property for a replacement, transferring said replacement property to an operating partnership comprising operating units, and receiving operating units in exchange for the replacement property, classified in class 705, subclass 36T.
 - II. Claim 68, drawn to facilitating a tax-deferred transaction involving an investor or investor partnership, calculating lease payment information entering in an agreement to receive a first interest in said investor partnership, classified in class 705, subclass 36T.
2. Applicant's election with traverse of Group I, claims 1-7, 14-19, 20-26, 33-39, 40-42, and 64-67, in the reply filed on 4/20/2009 is acknowledged. The traversal is on the ground(s) that a) The office has not established that the inventions identified are either independent or distinct, and b) The examiner has not established that the search and examination of all the claims in the current application cannot be made without serious burden. This is not found persuasive because as shown in the restriction requirement the requirements of each grouping are different resulting in patentable distinctions.

Further even though claims can be classified in the same class and subclass it does not allow.

The requirement is still deemed proper and is therefore made FINAL.

3. Claims 1-7, 14-19, 20-26, 33-39, 40-42, and 64-68 are currently pending.
4. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it focuses on transferring a replacement property for partnership units, not on interest in investor partnerships. The subcombination has separate utility such as calculating lease payment information, transferring in exchange for partnership interest.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

5. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election

shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
